

Patient: DANIJELA

Diagnosis: 31-year-old female diagnosed with Multiple Sclerosis 10 years ago.

Hi Dr. Rader,

The following improvements occurred within hours of my treatment while I was still in the Dominican Republic.

1- MY LEGS WERE MUCH LESS SHAKY AND UNSTEADY.

2- MY BALANCE IMPROVED SIGNIFICANTLY.

3- I WAS ABLE TO MAKE MUCH QUICKER MOVEMENTS THAN I COULD PRIOR TO MY TREATMENT.

It has now been 2 weeks since I was treated and I continue to feel better and better.

I cannot thank you enough.

Danijela
